

SIKA AT WORK

SHELL LUBE OIL CHANGE BAYS, KARACHI

HIGH PERFORMANCE EPOXY FLOORING SYSTEM

SHELL LUBE OIL CHANGE BAYS, KARACHI

SEAMLESS & AESTHETIC EPOXY FLOORING

Project:

The second largest oil company in the country, Shell Pakistan has successfully positioned itself as the preferred Oil and Gas company in Pakistan, leading the field in its commitment to customer service, quality of products, safety and environmental protection. With over 800 retail stations, Shell has the leading market share among foreign petroleum retail businesses in Pakistan. Shell in Pakistan is committed to the principle of sustainable development that can meet the needs of the present generation without compromising the ability of future generations to meet their own needs.

Project Requirements:

Shell prides itself on supplying its customers with the quality products and service over the years. Taking into account the hygiene needs, Shell Pakistan demanded durable & seamless epoxy flooring at Lube Oil Change bays in two retail stations at Karachi. Sika has been at the forefront of the flooring market for decades with its high performance, technology, expertise and a comprehensive range of hygienic flooring when it comes to commercial sector. Sika offered epoxy flooring solutions at newly built retail stations in Karachi i.e. Malik Service Station and Shell Safari namely. Shell Pakistan demanded Hygienic, Oil resistant & Anti-Skid flooring for its Lube Oil change bays. In order to fulfill this demand, Sika offered its Durable & long lasting hygienic flooring solution to give the Lube Oil change bays a fresh, smooth & aesthetic look. Lastly, client required marking at the flooring.

Sika Solution:

Sika is a leading supplier of highest standards of hygiene, free from joints or gaps that provide a hiding place for dirt and bacteria to breed. Sika recommended its all hygienic and seamless flooring solutions at the total area of 300 Sq. Ft. Antiskid at Malik petroleum station & 225 Sq. Ft. at Safari Park station to meet the hygienic flooring requirements of Shell Pakistan. Sikafloor- 263 SL 2-part epoxy SL self-smoothing and broadcast system was recommended for flooring at Lube Oil change bays. Sikafloor- 263 SL is a self-leveling system for concrete and cement screeds with normal up to medium heavy wear e.g. storage and assembly halls, maintenance workshops, garages, loading ramps, car parks, etc.

In addition to this, Sikafloor-161 primer was recommended for priming concrete substrates, cement screeds and epoxy mortars. Sikafloor-161 is a low viscosity epoxy resin which forms an Intermediate layer underneath Sikafloor-263 SL to give the flooring smooth & seamless look. Lastly, Sika Marker was recommended to mark the lube oil change area. Sika Marker is an aerial curing paint for car park and road lining & signing.
